Profile

I'm a motivated and adaptable student with experience in IT training, workshops, and project coordination. I have certifications in Python, Databases, and Device Configuration, plus skills in C++, Java, and web development. I enjoy solving problems, working in teams, and contributing to innovative projects.

Work experience

STUDENTERUNDERVISER

Oct 2025

VIA på Vejen

In my role at VIA på Vejen, I facilitated seminars aimed at helping teenagers navigate their future study paths and career options. I specifically focused on teaching Python programming through game development, utilizing pyGame to inspire creativity and technical skills in students.

Robotics Trainer

Jul 2023 - Aug 2025

ROBOCODE

At ROBOCODE, I had the opportunity to inspire and educate young minds in the fields of robotics and programming. I taught coding lessons to students aged 9 to 16, covering essential topics such as IoT, embedded C/C++, and game development. My role involved creating interactive and engaging lesson plans that made complex concepts accessible and enjoyable for children.

Education

Software Technology Engineering
VIA University College

Jan 2025

High School

Mihai Viteazul Theoretical Lyceum

Jan 2022 - Dec 2025

Certification

IT Specialist certification for "Databases"

IT Specialist certification for "Python"

IT Specialist certification for "Device Configuration and Management"
