Profile

Software engineering student at VIA University College. Builds client-server systems in Java and C# with relational databases and automated tests. Student tutor who teaches Python to teenagers and mentors new students.

Work experience

WEB DEVELOPMENT INTERN Fall 2026 - Present
Ludico Theatre

- Building the theatre's new website.

STUDENTERUNDERVISER (STUDENT TUTOR) Oct 2025 - Present
VIA University College, VIA på Vejen

- Teach Python through game development with pygame in seminars that help teenagers choose their studies.
- Mentor new students and organise events, including budgets and reports with the ESG group.

ROBOTICS TRAINER Jul 2023 - Aug 2025
ROBOCODE

- Taught IoT, embedded C/C++ and game development to students aged 9 to 16 for two years.
- Wrote lesson plans that made complex topics clear and fun to learn.

Projects

PARTAY Fall 2026

- Party music app where guests join with a QR code, add songs and vote on the queue, while the host keeps control of Spotify playback.
- C# and .NET MAUI app talks to two Java Spring Boot servers over REST, WebSockets and gRPC. MySQL stores the data and Redis holds live votes.
- Ran a survey with 48 respondents that reshaped the product around song requests and voting. Team of four, Unified Process.

FLIGHT BOOKING SYSTEM Spring 2026

- Java client-server application for flight search, bookings and user management on a relational database.
- Covered the system with automated tests. Scrum Master for a team of six.

Education

Software Technology Engineering (BEng) Sep 2025 - Present
VIA University College, Horsens

Certifications

IT Specialist: Databases Sep 2024
IT Specialist: Python Sep 2024
IT Specialist: Device Configuration and Management Sep 2024
